

# PARENT COMMUNICATIONS

**We are a paperless school and use two apps to communicate information to parents, both available free of charge for android or apple phones and tablets.**

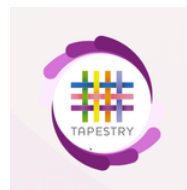

## Parentmail

**Iris Parentmail** is our main communication portal where you can receive important school information, fill in school forms, and book and pay for wrap-around childcare and school trips etc.

All parents/carers with parental custody will be set up with an account, using the information provided on the Admission Form. Please look out for an email/text message from Iris Parentmail inviting you to set up a log-in from your child's start date in September. Please be aware that this may be redirected to your spam folder. Where shared parenting is in place, we would advise both families set up an account to ensure payment privacy and enable separate parents evenings to be booked.

## Tapestry

**Tapestry** is the app that Nursery and Foundation Stage teachers use to update you about your child's progress in reaching their Early Learning Goals and to send you snapshots of your child in the setting. You will receive an email invitation to set up a parent account on Tapestry just after your child starts school. (Those families who have joined the primary school directly from our Nursery will not need to make any changes to their existing Tapestry account as we will transfer all the children to their new class automatically.)

Accounts will be set up for all new parents/carers with parental responsibility using contact details provided on your Admission Form.
